100% OF OUR STUDENTS WERE SATISFIED WITH THEIR COURSE
NATIONAL STUDENT SURVEY 2020

Human biology is a vibrant, interdisciplinary field that focuses on the biology of human populations. Human biologists study diverse topics such as human health and disease, human evolution, variation and adaptability, genetics, and human ecology.

On this Human Biology degree, you'll learn about the relationships between molecular, anatomical, physiological and anthropological aspects of human biology, with a focus on biomedical aspects of human processes, such as how we respond to infection and how drugs act on the body.

Our Human Biology degree course places significant emphasis on laboratory techniques, handling data, solving problems, writing reports and oral presentations. These elements enable you to understand scientific methods and critically evaluate scientific data, which are essential skills for a wide range of scientific careers.

REQUEST PROSPECTUS

Glyntaff

The Pontypridd Campus is made up of two sites; Treforest and Glyntaff. Our students love the community atmosphere. It's quieter than the cities, with green open spaces and views across the valley.

Student life

It's the community and friendships you'll build that make this place special. Outside your studies you can experience our amazing sport facilities and Students' Union.

Accommodation

Living in Halls is a great way to meet new people and make friends. We have high quality accommodation in Treforest, Cardiff and Newport.
